# Does the COVID-19 vaccine provide protection against the New Delta Variant?

---

Studies show that in countries where the variant is spread, unvaccinated populations are more likely to be hospitalized after infection. **Two doses of the vaccine should be administered to provide protection from the Delta Variant.**

# How can we protect ourselves from the Delta Variant?

Take the full course of vaccination to achieve full protection.

Abide by all preventive measures (safe distancing, mask wearing, hand hygiene)
